COMMUNITY SPACES IN URBAN LOW-INCOME RESIDENTIAL ENVIRONMENTS IN SRI LANKA AND ITS APPLICABILITY TO HIGH-DENSITY LIVING

A dissertation presented to the Faculty of Architecture University of Moratuwa For the Final Examination in M. Sc. Architecture

J. D. Wijethilake Faculty of Architecture University of Moratuwa Sri Lanka May, 2000

University of Moratuwa
ABSTRACT

From the history of civilization community spaces have been playing an important role in establishing the 'sense of community' within residential neighbourhoods. However, with urbanization communal life has become a very complicated, decreasing its importance. Due to the lack of proper environment for rich communal life, people have to live within a situation where the people and the places are unknown and instances were the information is unreliable. This has led people to live individually. Within such a situation it has become a challenge to achieve community cohesion.

Nevertheless, the community experts have understood the importance of community spaces as objects of creating healthy interaction among people of the community and therefore generating community cohesion. Their opinion is to use architecture to achieve this. It has been revealed that high-density residential areas are the most crucial in that problem.

Therefore this study is basically aimed at exploring the strategies that have been adopted to create healthy social interaction and identifying the contribution of built environment in terms of the design of community spaces. The study will specifically examine the contention that such community spaces are used variously by the inhabitants of the residences and that certain strategies used in these spaces are more conducive the interaction than others.

Therefore, the first stage of this study traces the value of urban public spaces as community spaces. The second part examines the role community spaces play within residential communities. At this the vitality of communal life as a key social binder and the forces shaping the communal life is discussed.

Finally the study consider about the importance of community spaces within low-income residential environments for their well-being. It identifies how the mechanisms of social interaction and generating a sense of community together could promote an architecture, which could uplift the neighbourly attitudes of people. The absence of above mechanisms had resulted number of problems in high-density areas. Lack of 'sense of community' is one of those. The study reveals the applicability of community spaces as a solution for that problem.
From the total study, it tries to explain the importance of the built-environment generating social interaction. Hence gives a clear knowledge of its accepted mores, and predictable guidelines for behaviour, an essential framework for social stability. So that, architects should understand the importance of built environment in terms of organization of space as a vehicle of behaviour for sense of control and collective coherent among the people, in creating a neighbourhood. Therefore it explains the applicability of community spaces for the creation of meaningful and habitable environments in high-density-housing schemes, to create sense of community within those neighbourhoods.
ACKNOWLEDGMENT

Many people helped me to make this dissertation a reality. It is to them that I humbly pay tribute..........

Archt. Vidura Sri Nammuni, senior lecturer, Dept. of Architecture for the inspiring discussions, advice and comments, the consent encouragement from the beginning and above all for believing in its worth.

Dr L.S.R. Perera, Archt. D.P Chandrasekara, Senior Lecturers, Dept of Architecture, for their invaluable advises.

Prasanna, Wasana, Champika, Manjula, Chandrasiri, Basnayake and Mahagama for all the assistance offered and especially for their kind encouragements when the going was rough.

Nimali, for spending her valuable time, uncomplainingly, in making typescript.

My dear parents and brothers and sisters, for their sincere consent and encouragement given when I was morally down and throughout my dissertation.

Finally, to each and everyone, mentioned and unmentioned here, thank you once again for being with me, sparing your valuable time, on my behalf in making study a possibility.

## FIRST CHAPTER

### USE OF URBAN PUBLIC SPACE AS COMMUNITY SPACES

1.1 Definition of urban public space | 7
1.2 Manifestation of urban public spaces | 9
   - 1.2.1. Unplanned development | 9
   - 1.2.2. Planned development | 11
1.3 Typology of urban public spaces and observable patterns | 12
   - 1.3.1 Recreation oriented urban public spaces | 14
   - 1.3.2 Commercial oriented urban public spaces | 17
   - 1.3.3 Transport oriented urban public spaces | 19
   - 1.3.4 Residential oriented urban public spaces | 19
   - 1.3.5 Religious oriented urban public spaces | 20
1.4 Significance of urban public spaces as community spaces. | 21

## SECOND CHAPTER

### COMMUNITY SPACES IN RESIDENTIAL ENVIRONMENTS

2.1 Definition to the community space | 24
2.2 Nature of communal life within a residential community space | 25
2.3 Nature of contacts within a residential community space | 26
2.4 Importance of communal life as a key social binder | 29
2.5 Forces shaping the communal life | 34
   - 2.5.1. Social forces | 35
   - 2.5.2. Physical forces | 36
2.6 Community spaces as a reflection of communal life within residential environments. | 38
2.7 Observable patterns of residential community spaces | 39
THIRD CHAPTER
COMMUNITY SPACES IN URBAN LOW-INCOME RESIDENTIAL ENVIRONMENTS AND ITS USAGE

3.1 Community spaces in urban low-income Residential Environments
   3.1.1 Urban low-income residential environments
   3.1.2 Types and nature of community spaces within urban low-income residential environments
   3.1.3 Mechanisms of enhancing social interactions in strengthening the 'sense of community'
      3.1.3.1 Mechanisms of creating social interaction within a community space
      3.1.3.2 Creation of 'sense of community' within the neighbourhood
   3.1.4 Use of the "sense of community" for the well being of residential communities
   3.1.5 Case studies
      a.) Panchikawatta low-income residential community
      b.) Nawagampura low-income residential community

3.2 Applicability of community spaces in high-density living.
   3.2.1 Definition to high-density living
   3.2.2 Factors leading high-density living
   3.2.3 Problems of high-density living
   3.2.4 Applicability of community spaces as solution for that.

3.3 Concluding remarks

CONCLUSION
