

UNION 481

Study of Relationship Between Thermal Comfort Variations and the Urban Canyon Geometry within urban blocks in Colombo.

 University of Moratuwa, Sri Lanka.
 Electronic Theses & Dissertations
 A Dissertation Submitted to the

University of Moratuwa Sri Lanka, as a Partial
 Fulfillment of the Requirement for the
 Degree of Master of Science in
 Architecture.

Acknowledgement

My sincere gratitude to each and every person for their involvement to make this dissertation a reality.

My sincere thanks to Prof. Nimal de silva, Dr. M.P.R.Emmanuel, Sr. lecturer, Archt. M. Pramathilaka, Sr. lecturer, my year Master Dr. Dayarathna, Sr. lecturer, Dr. L.S.R.Perera Sr. lecturer, of the faculty of Architecture of the University of Moratuwa.

To many erstwhile colleagues in the Department of Architecture of the University of Moratuwa, Sanjeewanie, Chamila and my dear friends Saman, Gayani, Dinesha, Lalith. I owe my thanks for many contributions to the inter-disciplinary context in which the study originated.

Finally my particular thanks to my family members, especially to my mother, brother and my uncle for all helps and encouragement.

List of figures	ii
Chapter 1	
Introduction	1
1.1 Issue	1
1.2 Rationale of the study	1
1.3 Objectives	3
1.4 Method of study	3
1.5 Scope of the study	5
Chapter 2	
Thermal comfort requirements in the urban equatorial tropics.	6
2.1 The theoretical basis of thermal comfort	7
2.2 Urban Heat Islands phenomena	10
2.2.1 Causes of Urban Heat Island Effect	13
2.3 Overall spatial pattern of the urban heat islands in equatorial regions.	26
2.3.1.Characteristics of urban heat islands in equatorial regions.	27
2.3.2. Thermal comfort in equatorial urban outdoors	29
2.3.3. Urban density and Canyon geometry impacts on thermal comfort in equatorial regions.	32
2.4 Colombo City as an urban heat island	37
2.4.1. Problems related to Colombo City Microclimate	38

University of Moratuwa, Sri Lanka.
Electronic Theses & Dissertations
www.lib.mrt.ac.lk

Chapter 3

Method of the study	42
3.1 Study of the selected urban blocks in Colombo City	43
3.1.1 Colombo Fort	43
3.1.2. Union place	47
3.1.3 Colombo 05	49
3.2 Procedure and method of using Instruments	51
3.2.1. Measurement protocol	51
3.3 Data analysis protocol	52

Chapter 4

Results of the study	50
4.1 Results of the Colombo Fort	56
4.2 Results of the Union Place	58
4.3 Results of the Elebank	60
4.4 Results of the Colombo weather station	63

Chapter 5

University of Moratuwa, Sri Lanka
Electronic Theses & Dissertations
www.lib.mrt.ac.lk

Analysis of field study data	65
5.1 Analysis of Colombo Fort results	65
5.2 Analysis of Union Place results	78
5.3 Analysis of Elebank results	93
5.4 Comparison of the field study data	102
5.5 The prediction of thermal comfort	105
Conclusion	116
Bibliography	118
