# AN EXAMINATION OF CONCEPT OF INDUSTRIAL ECOLOGY WITH SPECIAL REFERENCE TO THELAWALA INDUSTRIAL AREA

R.M. Dhammika Premaseeli

(08/9632)

Master of Science Degree

Department of Town Country Planning

University of Moratuwa Sri Lanka

2010/2011

#### **DECLARATION**

I declared that this research project report represent my own work, except where due acknowledgement is made and that has not been previously included in a thesis, dissertation, or report, submitted to the University of Moratuwa or any other institution for a degree, diploma or other qualification. I wish to also declare that the total number of words of the body of this report (excluding the tables, appendices, end note and the bibliography) is 15,000 words.

Signature	:	
Name of the Candidate	:	R.M. Dhammika Premaseeli
Group	÷	2010/2011
Index Number	:	08/9632
Date	:	April, 2014

### **CERTIFICATION**

I certify herewith that R.M. Dhammika Premaseeli, Registration No. 08/9632 of the Master of Science Degree in Town & Country Planning 2008/2009 Group, has prepared this Research Project under my supervision.

Signature of the Principal Supervisor	Head
Name:	Department of Town & Country Planning
Date:	Date:

#### ACKNOWLEDGMENTS

This study was carried out with the help of very many persons far too many to be mentioned by name but each and every one of them I acknowledge most humbly.

I am grateful to Dr. Jagath Munasinghe, Head of the Department of Town & Country Planning for overall supervision, guiding and assisting in all possible ways to make my effort a success.

I am grateful to Professor P.K.S. Mahanama, Dean of the Faculty of Architecture of Moratuwa University for his valuable guidance and assistance extended to me throughout this study.

.

My sincere thanks are extended to Mr. K.D Fernando, Senior Lecturer, Department of Town and Country Planning for his valuable suggestions, guidance and encouragement offered to me in drafting this dissertation.

I am also thankful to Mr. Linton Wijepala Architect and Mr. Channa Wijepala Architect ,who gave me valuable suggestions to be considered shaping up of this study.

I am also thankful to my employer, The Urban Development Authority for giving me an opportunity to follow this M.Sc Degree Programme..

I wish to express my sincere gratitude to all The Institutions and individuals who helped me in numerous ways in collecting the necessary information.

Finally, I wish to thank my husband and my parents who have been helping and encouraging me in numerous ways to complete my M.Sc Degree Programme and also this dissertation.

#### R.M. DHAMMIKA PREMASEELI

#### **ABSTRACT**

Industrial Ecology is an industrial environmental management concept with an analogy in the natural ecosystem. In an ecosystem, materials are recycled between organisms, and energy is embedded in the matter of the food chain, while the only external input to the system as a whole is the solar energy. Ecosystem is a system where the industrial actors use this natural recycling model and co-operate by using each other's waste material and waste energy flows to minimize the system An Industrial virgin material and energy input as well as the waste and emission output from the system as a whole. In theory, concept of Ecology system has been defined as raw material, emission control and waste management costs are reduced through using waste as a resource of production.

The Development of Industrial Ecology is an attempt to provide a new conceptual framework for understanding the impacts of industrial systems on the environment. This new framework helps to identify and then implement strategies to reduce the environmental impacts of products and processes associated with industrial systems, with an ultimate goal of achieving sustainable development. Industrial ecology is the study of the physical, chemical, and biological interactions and interrelationships both within and between industrial and ecological systems. Additionally, some researchers argue that Industrial Ecology involves identifying and implementing strategies for industrial systems to more closely emulate harmonious, sustainable, Ecological Ecosystems.

In this context, the present study attempts to analyze the application of Industrial Ecology concept in Sri Lanka with special reference to the Thelawala Industrial Area located in Moratuwa town in the District of Colombo, Sri Lanka.

Abstract	iv
List of Figures & Tables	v
List of Abbreviations	vi
Chapter One	
Introduction	
1.1 Background of the study	01
1.2 Research Objective	02
1.3 Methodology of the Study	02
<b>1.4</b> Scope and Limitation of the Research	04
Chapter Two	
Literature Review	
2.1 Introduction	05
2.2 The Origin and the Concept of Industrial Ecology	05
2.3 The Principles of Industrial Ecology	07
2.3.1 Materials flow in Industrial Ecology	11
2.3.2 Quasicyclic Materials flows	12
2.3.3 Resource flows in industrial Ecology	13
2.3.4 The Integrated Industrial Ecology Cycle	16
2.4 The Applications of Industrial Ecology	19
2.4.1 The Emergence of an Eco-Industrial Infrastructure	20

2.5 Industrial Ecology applications in Sri Lanka		
2.6 The Limitations of IE Applications	23	
2.7 Merits and Demerits of Industrial Ecology Application	23	
2.7.1 Constraints and Incentives for Industrial Ecology	23	
2.8 Conclusion	24	
Chapter Three		
Research Design		
3.1 Introduction	26	
3.2 Industrial Policy In Sri Lanka	26	
3.2.1 Major environmental problems associated with Industries in Sri Lanka	27	
3.2 .2 Key Institutions involved in Promoting Industrial Development and	29	
Environmental Management		
3.3. Methodology	32	
3.4 Case Study Area of Thelawala Industrial Zone	35	
3.5 Conclusion	38	
Chapter Four		
Data Analysis		
4.1 Introduction	39	
4.2 The patterns of the Land use Development in Thelawala		
4.3 Existing Industrial units in the Thelawala Area	41	
4.4 The Material flow in the Thelawala area	41	
4.5 Industrial Ecology symbiosis system in Thelawala	62	
4.6 Proposed Symbiosis model in Thelawala	64	
4.6.1 Missing link (Proposed link) of The Thelawala Area	68	
4.6.1.2 Proposed Water Treatment Plant	68	
4.6.2 Proposed Material integration in Thelawala Eco Industrial Park	74	

4.6.3 Proposed Energ	gy integration in Thelawala Eco Industrial Park	74
4.6.4 Proposed Tech	hniques Integration in Thelawala Eco Industrial Park	75
4.6.5 Proposed Inform	nation Sharing System for Thelawala	75
4.7 Establish the Facility	Pool for Thelawala Industrial Park	77
4.7.1 Typical Charact	eristics of the Proposed Ecology Symbiosis System for	77
the Thelawala In	dustrial Park	
4.7.2 Expected results	s of the Eco Symbiosis System of the Industrial	78
Ecology		
4.7.3 Expected Regul	atory Context in Thelawla	78
4. 8 Implementation of In	dustrial Ecology Symbiosis System in the	78
Thelawala Area		
4.9 Proposed implementa	tion system of Industrial Symbiosis in the Thelawala	83
4.10 Conclusion		83
