CHALLENGES IN IMPLEMENTING IT SERVICE MANAGEMENT FOR TELECOMMUNICATION SECTOR IN SRI LANKA

P.A.Manomi Deepika Perera

(10973)

University of Moratuwa, Sri Lanka. Electronic Theses & Dissertations www.lib.mrt.ac.lk

Thesis/Dissertation submitted in partial fulfillment of the requirements for the degree Master of Business Administration in Information Technology

Department of Computer Science Engineering

University of Moratuwa

Sri Lanka

December 2011
DECLARATION

I declare that this is my own work and this dissertation does not incorporate without acknowledgment any material previously submitted for a Degree or Diploma in any other University or institute of higher learning and to the best of my knowledge and belief it does not contain any material previously published or written by another person except where the acknowledgement is made in the text.

Also, I hereby grant to University of Moratuwa the non-exclusive right to reproduce and distribute my thesis/dissertation, in whole or in part in print, electronic or other medium. I retain the right to use this content in whole or part in future works (such as articles or books).

Signature:       Date:

The above candidate has carried out research for the Masters Dissertation under my supervision.

Signature of the supervisor:       Date:
ABSTRACT

The Sri Lankan telecommunication industry has an immense competition today, in which a number of major players are battling to increase their subscribers and most importantly, their market share. On the other hand over the past several decades, "Information Technology" has become the primary technology that affects everyone in the modern world in their day-to-day lives. As telecommunication is a technology driven industry where information technology plays an important role in, telecommunication companies are required to strengthen their Information Technology Services Management (ITSM) framework in alignment with the present environment and its challenges.

This research is carried out to find out, to what extend the Sri Lankan telecommunication industry uses ITSM and to find out the challenges faced by them when implementing ITSM. The research identifies the major challenges that the local telecommunication organizations have to face when implementing ITSM. As a preparation for the research an extensive literature review was done in the areas of ITSM implementation frameworks, key success factors in ITSM implementation, and challenges in implementing ITSM for various industries. The research was done based on a survey among the IT management staff of Sri Lankan telecommunication companies, using a questionnaire. Based on the challenges identified from the research, the recommendations were made to overcome them.

The findings of this research and proposed recommendations are helpful for any telecommunication organization, which is going to implement IT service management. Also this research findings and recommendations are useful not only for the local telecommunication industry but also for many other local industries which may be considering ITSM implementation.
ACKNOWLEDGEMENT

I would like to take this opportunity to acknowledge and extend my heartfelt gratitude to the all the people who supported in numerous ways to make this research a success.

Firstly, I would like to extend my sincere gratitude to my supervisor Dr. Chandana Gamage, Head of the department, Department of Computer Science and Engineering, University of Moratuwa, whose advice and guidance were invaluable. Especially for his vital encouragement and support.

I also thank Mrs. Vishaka Nanayakkara, Department of Computer Science and Engineering, University of Moratuwa, for teaching us the alphabet of research and encouraging us to carry out the research successfully.

I further extend my deepest gratitude to all academic and non-academic staff of Department of Computer Science & Engineering and library staff of University of Moratuwa for their support in numerous ways. I would also like to express my gratitude to all the colleagues in my MBA batch who were always sharing their knowledge and for the support provided during the literature survey for this research.

Next, I deeply cherish all the professionals in Telecommunication organizations for extending their support by providing their feedback and support in this research.

Last but not least, I would like to thank my dear parents and my dear husband. Without their support, patience and scarification this endeavour would have been impossible.

P.A.M.D.Perera
