A DISSERTATION
SUBMITTED TO THE
FACULTY OF INFORMATION TECHNOLOGY,
UNIVERSITY OF MORATUWA, SRI LANKA
FOR THE PARTIAL FULFILLMENT OF THE REQUIREMENT
OF THE MASTERS DEGREE OF
MASTER OF SCIENCE IN INFORMATION TECHNOLOGY

JUNE 2017

Declaration

I hereby declare that the project work entitled “Handwritten Computer Program Recognition, Compilation & Execution Application”, submitted to the university of Moratuwa, Sri Lanka, is a record of an original work done by me, under the guidance of my Supervisor Senior Lecturer Mr.Saminda Premaratne. This project work is submitted in the partial fulfillment of the requirement for the award of the degree of Master of Science in Information Technology. The results embodied in this report have not been submitted to any other University or Institution for the award of any degree or diploma. Information derived from the published or unpublished work of others has been acknowledged in the text and a list of references is given.

Supervisor

Mr.Saminda Premaratne..... Date: / /

(Senior Lecturer – University of Moratuwa)

Student

Dedication

I would like to dedicate this thesis to my supervisor, senior lecturer **Mr.Saminda Premaratne** who gave me tremendous support and motivation throughout the entire process of the research.

Acknowledgement

I would like to express my special appreciation and thanks to my advisor, Senior Lecturer Mr.Saminda Premaratne, you have been a tremendous mentor for me. I would like to thank you for encouraging my research and for allowing me to grow as a research student. Your advice on both research as well as on my career has been invaluable.

Besides my supervisor, I would like to thank, Prof. Asoka S. Karunananda Dean of Kothalawala Defense University. The quality of this thesis and research have improved by using comprehensive guidelines of Prof. Karunananda. I would also like to acknowledge the rest of lectures in the department of IT at university of Moratuwa, Sri Lanka for their encouragement.

Last but not the least, I would like to thank my colleagues and family for supporting me spiritually throughout and my life in general.

Abstract

Make a computer program that does automatically recognize a handwritten computer program, compile and execution is extremely difficult. The reasons for these are the various types, shapes of handwritten characters of different peoples. This paper provides an accurate handwritten character recognition method, which blend with the image processing and the training for handwritten characters. Further, automatic error correction of handwritten program, compilation and execution of the program, will be discussed in detail throughout the paper.

Recognition of handwritten characters has been a research challenged. Handwritten character recognition belongs to the family of optical character recognition performing automatic identification. Among other issues in optical character recognition, handwritten identification, accuracy or the correctness is the main research issues.

This research has developed a system for identification of handwritten characters. The solution can identify the handwritten characters with a higher level of accuracy. This solution can deal with any images captured by a digital camera or scanned images of handwritten characters. The algorithm applies on preprocessed image with handwritten characters. The preprocessor has used standard image processing techniques and the trainer is used to train for the specific handwritten characters.

Table of Contents

1	Introduction.....	1
1.1	Prolegomena.....	1
1.2	Background and motivation	2
1.3	Problem statement	2
1.4	Hypothesis	3
1.5	Objectives.....	3
1.6	Blend of Image Processing & Training approach	3
1.7	Structure of the thesis	4
1.8	Summary	4
2	Developments and Challenges in Handwritten Character Identification.....	5
2.1	Introduction	5
2.2	Categorization of OCR.....	5
2.3	Essential Image Processing Techniques used in OCR.....	6
2.4	Supporting Tools and Techniques in OCR	11
2.5	Problem Definition.....	12
2.6	Summary	13
3	Image processing and Tesseract OCR engine in handwritten computer program recognition	14
3.1	Introduction	14
3.2	Image processing – Preprocessing	14
3.3	Tesseract OCR engine	14
3.4	Summary	16
4	Approach.....	17
4.1	Introduction	17
4.2	Hypothesis	17
4.3	Users.....	17
4.4	Input	17
4.5	Output.....	18
4.6	Process.....	18
4.6.1	Image Acquisition.....	19

4.6.2	Image Preprocessing	19
4.6.3	Language Training	22
4.6.4	Character Recognition	23
4.6.5	Post Processing and program execution	23
4.7	Features	24
4.8	Summary	24
5	Design	25
5.1	Introduction	25
5.2	Top Level Architecture	25
5.3	Interface Module	26
5.4	Preprocessing module	26
5.5	Language Training module	27
5.6	Character Recognition Module	27
5.7	Post processing and execution module	28
5.7.1	Format Code.....	28
5.7.2	Check Brackets	28
5.7.3	Check & Correct Syntax	28
5.8	Summary	29
6	Implementation	30
6.1	Introduction	30
6.2	Overall Solution	30
6.3	Implementation of the interface module	30
6.4	Implementation of the preprocessing module	32
6.4.1	Gray Scaling.....	32
6.4.2	Thresholding	33
6.4.3	Noise Removal.....	33
6.4.4	Thinning.....	33
6.4.5	Skewing.....	33
6.5	Implementation of Training Module	34
6.6	Implementation of Post processing and Execution module	36
6.7	Summary	37
7	Evaluation	38

7.1	Introduction	38
7.2	Participants	38
7.3	Testing Environment	38
7.4	Data collection.....	38
7.5	Data Analysis	39
7.6	Summary	43
8	Conclusion	44
8.1	Introduction	44
8.2	Overview of the research.....	44
8.3	Major Findings	44
8.4	Future work	45
8.5	Summary	45
	References.....	47
	Appendix.....	50
