Dissertation submitted to the Faculty of Information Technology, University of Moratuwa, Sri Lanka for the partial fulfillment of the requirements of the Degree of Master of Science in Information Technology.

June 2016

Declaration

I declare that this Thesis is my own work and has not been submitted in any form for another degree or diploma at any University or other institution of tertiary education. Information derived from the published or unpublished work of others has been acknowledge in the text and a list of references is given.

Acknowledgements

Foremost, I would like to express my sincere gratitude to my supervisor Ms.G.T.Indika Karunaratne, for the continuous support of my MSc study and research, for her patience, motivation, enthusiasm, and immense knowledge. I have been amazingly fortunate to have a supervisor who gave me the freedom to explore on my own and at the same time the guidance to recover when my steps faltered. Besides my supervisor, I would also like to thank my family for the support they provided me through my entire life and in particular, I must acknowledge my father and mother for the encouragement and guidance throughout my MSc.

Abstract

Equipment Market in Sri Lanka facing various problem. For example Equipment Market introduce new versions with new features Passion and Fashion. So people would like to buy newly introduced equipment in the market or latest versions. But they don't have a clear idea when they select their dream equipment. So they spend their valuable time for selecting their loveable one. And sellers also have issues for keeping the stock, and they don't know which customers going to buy which one or customers most preferable one. Sales persons also spent time with customers but unfortunately they can't satisfy their customer's requirement.

The Sellers must need their customers feedback for improve their future customer services. Otherwise they don't understand customer expectations.

The Sellers must know how to maintain their stock. For example which equipment has most selling rate which has less is selling rate and which season or which month how to track the stock.

So these above issues have to wind up and both The Sellers and The Consumers save their valuable time, customers get a good customer service and take their dream equipment and the seller give a best idea for the customers.

So seller need a good product for solve above issue.

Table of Contents

Chapter 01	01
Introduction	01
1.1 Prolegomena	01
1.2 Background and Motivation	01
1.3 Aim and Objectives	02
1.3.1 Research Plan	03
1.3.2 Objectives	03
1.4 Structure of the Thesis	04
1.5 Summary	04
 Chapter 02	 05
Issues in Equipment Market	05
2.1 Introduction	05
2.2 Others work	05
2.3 Summary	07
 Chapter 03	 08
Technology Adopted to the Research	08
3.1 Introduction	08
3.2 The questionnaire Method	08
3.3 Data Mining Approach	08
3.3.1 Data Mining Process	09
3.3.2 Problem Definition	09
3.3.3 Data Gathering	09
3.3.4 Data Cleaning	09
3.3.5 Identify the model	10
3.3.6 Knowledge Development	10
3.4 Laravel Framework	10
3.5 PHP scripting Language	10
3.6 MySQL Database Management System Tool	10
3.7 XAMPP Server	10
3.8 JQUERY Javascript Library	11

3.9	Bootstrap	11
3.10	CSS	11
3.11	Summary	11
Chapter 04		12
Implement Data Mining Techniques		12
4.1	Introduction	12
4.2	Questionnaire	12
4.3	Hypothesis	13
4.3.1	Data cleansing Techniques	14
4.4	Dataset	18
4.5	Test Set	18
4.5.1	Sample Test Data set i	19
4.5.2	Sample Test Data set ii	19
4.5.3	Sample Test Data set iii	19
4.6	Summary	19
Chapter 05		20
Experimenting with data mining models		20
5.1	Introduction	20
5.2	Experimental Background	20
5.3	Find the model	21
5.4	J48 Decision Tree	22
5.5	Naïve Bays Classifier	22
5.6	Interface	23
5.6.1	Prediction Device	31
5.7	Other Features	31
5.7.1	Insert Customer	31
5.7.2	Insert Device	32
5.8	Equipment Prediction Engine	32
5.8.1	Customer Data base	33
5.8.2	Device Data base	33
5.9	Summary	33

Chapter 06	34
Implement Data Mining Techniques	34
6.1 Introduction	34
6.2 Data Mining Techniques using by WEKA Tool	34
6.2.1 WEKA Tool	34
6.5 Summary	39
Chapter 07	40
Evaluation	40
7.1 Introduction	40
7.2 J48 Classifier Results	40
7.3 Summary	41
Chapter 08	42
Conclusion and Further Work	42
8.1 Introduction	42
8.2 Limitation	42
8.3 Further Work	42
Reference	43
Appendix A – Summary Survey Answers	
Appendix B - Final Input	
Appendix C – Results J48, Naïve Bayes	
Appendix D – Test Data Sets
