ACKNOWLEDGEMENTS

A number of individuals have been instrumental in the final product of this dissertation. I would like to express my sincere gratitude to each and every one for their help and guidance extended to me, during the study.

I extend my sincere gratitude to Archt. Vidura Sri Nammuni, Head of the Department of Architecture, University of Moratuwa. I am also deeply indebted to Dr Upendra Rajapaksha, who coordinates the dissertation and Archt. Prasanna Kulathilaka; for their incisive advice and invaluable comments and encouragement throughout the whole process of completing the product.

I am deeply indebted and my heartfelt gratitude to Archt. Varuna De Silva, lecturer of the Department of Architecture, who gave me right guidance throughout this endeavor. Also I express my honour and gratitude to Dr. Harsha Munasinghe and Dr. Samitha Manawadu for their valuable time and advice on complete this dissertation. Then my special thanks go for the 6th year masters; Archt. Jayanath Silva, Archt. Garmini Weerasinghe, and Archt. Arosha, for their invaluable comments and support during the period by giving relevant particulars.

I am also very grateful to Shabee, who helped me by making comments on the study to make it attentive. And finally I would like to thank my parents, Thilina, Sundara Uncle, Sujith uncle, and other family members and friends for their support in numerous ways; and encouragement provided to make this study success.

CHAPTER TWO: Transitional Space as a Conditioning Space of Behaviour

2.1 Transitional space and its impact upon user
   2.1.1 Transformation with in transitional space
   2.1.2 Physical and psychological role

2.2 Generation of character of transitional space
   2.2.1 Organic order
   2.2.2 Structure of patterns
   2.2.3 Patterns of transitional space

2.3 Types of transitional space
   2.3.1 Spatial transitional space
   2.3.2 Visual transitional space

2.4 Transitional behaviour in relation to the language of architecture
   2.4.1 Arousal of behaviour
   2.4.2 Regulation of behaviour
   2.4.3 Sustenance of behaviour

2.5 Out-door as a transitional factor in architecture
   2.5.1 Formation of out-door transitional spaces

2.6 Concluding remarks

CHAPTER THREE: Use of Water as Transitional Factor in Architecture

3.1 Spatiality of water
   3.1.1 Water as material of out-door formation

3.2 Water as an influencing factor of transition
   3.2.1 Motivational attributes of water in out-door spaces
   3.2.2 Spatial and visual importance of water in out-door

3.3 Water in out-door as transitional medium
   3.3.1 Water in static form
3.3.2 Water in dynamic form 30
3.3.3 Water as generating factor of ‘rasa’ 32
3.3.4 Symbolizing water with other means 32

3.4 Relationship between water in out-door and the built environment (architecture) 34
3.4.1 Conditioning the behavior and the mind-set of user 34
3.4.2 Enhancing spatial experiences 35

3.5 Transitional behavior and satisfaction of transitional need by water in out-door space 35
3.5.1 Water as factor of arousal of behaviour - Portland plaza - San Francisco 35
3.5.2 Water as factor of regulation of behaviour - Ryoanji temple - Kyoto 36
3.5.3 Water as factor of sustenance of behaviour - Re.of P.Jayawardane Sri Lanka 37

3.6 Concluding remarks 38

CHAPTER FOUR: Creating Transition through Water in Out Door Spaces 39
4.1 Transition as an influencing factor for achieve the ultimate goal of architectural space 40
4.2 Basis of selection of case studies 40
4.3 Case studies 41
4.3.1 Case study 1: Sigiriya pleasure garden as a leisure oriented public space 42
4.3.1.1 Introduction 42
4.3.1.2 Transitional attributes of spaces and its impact on user 43
4.3.2 Case study 2: Blue waters as a recreational oriented public space 49
4.3.2.1 Introduction 49
4.3.2.2 Transitional attributes of spaces and its impact on user 49
4.3.3 Case study 3: Parliament Complex as a public space for selected group 54
4.3.3.1 Introduction 54
4.3.3.2 Transitional attributes of spaces and its impact on user 55

4.4 Analytical conclusions on case studies 59

</table>
24. Out-door would arouse behavioral change in human mind
25. Regulation of behaviour, due to calm panoramic view
26. Out-door is the enhancing factor of architectural experiences
27. Nature is fully disturbed and thereby uncomfortable for human survival
28. Out-door can be utilized as 'transitional space' for better human habitation
29. Very limited out-door also can create positive transition
30. Individual building blended in with its site
31. Individual building contrasted against its site
32. Conscious out-door formation generates transitions and thereby
    Influences architectural experiences

Chapter Three

33. Qualitative aspects of water depend on the out-door formation
34. Water arise qualitative aspects of out-door by enhancing
    transitional emotions
35. Dynamism of water depends on the out-door formation
36. Static water generates contemplative impact on human mind
37. Spatial transitional space as a possession of movement
38. Spatial transition designed as a static resting
39. Water is a motivational factor in out-door formation
40. Still water reflects whole world beyond
41. Nature of pools
42. Dynamism of water
43. Behaviour of flowing water with respect to channel condition
44. Various falling attributes of water
45. Expression of a vast expansion of water through racked gravel
46. Water creates moods of contemplation
47. Water creates dramatic joyfulness
48. Disgracefulness in water
49. Water enhances the rhythmic relationship of spaces
50. Portland plaza, exciting experience of water
51. Love-joy plaza, gives dynamism of water
52. Residence-Calm but yet alive quality

Chapter Four

53. Out-door would conditions the behaviour according to the achievable goal of the building

Case Study One

54. Sigiriya – Palace in the sky
55. Layout plan of the Sigiriya
56. Sigiriya wawe sustenance behavior for static pause
57. Linier approach creates gradual transition by arousing positive movement
58. Calm water body creates moods of contemplation
59. View of the pleasure garden from the rock
60. Dynamic experience of water arouse dramatic behavioral impact on user
61. Water staircases in Sigiriya
62. Fountain jets increase the dynamism of place
63. Formal octagonal shape of water and irregular shape of the rock boulder
64. Flight of steps creates gradual transitional movement
65. Visual transitions as a vista through massive rocks
66. Infinite nature reduces the tension and tiredness
67. Narrow rocks restricted behaviour for necessary activities
68. Sudden transition arouse gasp emotional and behavioral change
69. Water in out-door brings overall enthusiasm

Case study Two

70. Blue waters is the place where sky can speak with the blue ocean
71. Layout of Blue Waters
72. Entrance creates sudden transitional in human mind
73. Vista of the sea at far end
Water in out-door as transitional space in architecture

List of Figures

74. Corridors as 'build room' formed a vista of out-door space beyond 50
75. Physically and psychologically comfortable transitional impact 51
76. Dynamism of water transit mind to be active and live 51
77. Tranquility and calmness of the water pool 51
78. Horizon becomes boundary, to finite the space 52
79. Dining space harmonized 'in-space' with 'out-space' 52
80. Water-with-water 52
81. Deep pleasure and relaxation will deviate mind from temporal world 53

Case Study Three

82. Ceremonial and monumental quality of the parliament 54
83. Stands above the water 55
84. Gradual behavioral movement aroused, due to water and surrounding environment 55
85. Layout plan of the complex 55
86. Water enhances the transitional attributes of out-door 56
87. Out-door influences the transition further 56
88. In-door keeps visual relation with out-door as enhancing factor of transition 57
89. Enclosure demarcates the higher purpose of the building 58
ABSTRACT

Marcel Brener says "space is never complete and finite. It is in motion, connected to the next space, and to the next space...and to the finite space." (Quoted in Siminds, O.J – 1983) Along this flow of spaces, the ‘transitional space’ becomes more important, because it is an intermediate space which has capabilities of condition the human mind for subsequent environment. The transitional need in human mind will be governed by the expressive qualities of the spaces and their relationships.

Normally designers try to upgrade the building quality by using different forms, colors, materials, textures, etc. and make architectural work more attentive. But this would create an artificial and uncomfortable impact on user, for adjusting the new experience immediately. Such sudden change of experience would lead for generate inappropriate behavioral pattern in human. Therefore the transitional (in-between) spaces can be introduced between spaces to harmonize the contrast in the context and; to enhance the quality of architectural experience. "The transition must, in effect, destroy the momentum of the closed-ness, tension and distance..." (Alexandra C, 1977)

As a natural phenomenon, human ingenuity firstly depends on the natural pressure and later by the artificial means. Therefore eventual instincts of human being tend to be with the nature due to its flexibility and appropriateness on conditioning human mind for the changing contexts. Especially, properly designed out-door would promote physical and psychological comfort on user, in order to become a conditioning space of behaviors as the ultimate purpose of the building. Therefore the out-door space cannot be considered as a just left out space by the building; it should be utilized as a conditioning space of human spatial experience. Water as one of mans’ inherent motivational factor of giving inspirations and emotions, can be utilized as a design element of out-door formation. Water in out-door would become a successive conditioning factor for generate proper human motivation and it enhances the spatial relations in more meaningful manner.

This dissertation would discuss transitional need among the spaces, and how the water in out-door could be used as a conditioning factor for humanized the spatial experiences in satisfactory manner.
