Abstract

"There is no effect of form which the effect of material could not enhance"

(George S.T.)

Architecture is the composition of material in creating built form. And generating meanings from them. The nature of the material in use of transforming idea in to matter is two fold.

The physical nature of a material used in a building is its time value, strength, texture, surface & colour. The selection of a material for its finish, texture & colour stimulate as emotional response. Sensory experience for we can touch, smell, see & feel the space created. It makes architecture solid & tangible.

As expressive elements, material has essence (aesthetic quality) which gives original to the material. This essence of material contributes to its physical nature. It also gives rise to understanding the built form at a deeper level triggering connotations & symbols. The physical qualities (colour, texture, condition, the way of handling it, time value) & essence of the material directly contribute as a element of expression in architecture and give meaning to the built form.

Considering the sacred architecture, the inter relationship between materials & architectural expressions can be identified clearly.

They expressed their religions concepts through the built environment by using materials as an expressive element. And they were successful in giving sacredness quality to built forms & still the people can impressed the quality by experiencing it.

They were used the colour, texture, time value & the essence of the material & they were processed them in some extend to get the sacred quality to the building.
Acknowledgement

I take this opportunity to offer my sincere gratitude to all who helped me in the preparation of this dissertation. Among them I am deeply thankful to,

- Prof. Samitha Manawadu, Head of the Department University of Moratuwa, Dr: Harsha Munasinghe, coordinator, M.Sc. dissertations, Archt. Arosh Gamage Senior Lecturer, Faculty of Architecture for valuable guidance on research and resources till the completion of the dissertation.

- Archt. Sithumina Ratnamalala, Senior Lecturer, faculty of architecture, Eng/Landscaper. Susira Udalmatte Senior Lecturer Faculty of Architecture, Landscape Division for the comments and guidance.

- My special thanks for Wasana and colleagues Nuwan, Chaminda and all, who helped me in numerous ways.

- Last, but by no means, not least my dear parents and sister who allowed me to start a career on architecture six years ago regardless of the trend and continuing that support and guidance throughout my university education...!

Introduction xi

A. Importance of study.
B. Intention of the study.
C. Method of study.
D. Scope & limitations.

Chapter 01

Materials and expressions in sacred architecture

1.1. Materials and their place in architecture 01
   1.1.1. Concepts & Methods of using materials in Architecture 02
   1.1.2. Materials as an inspiration for expression 12
   1.1.3. Essence of Materials in Architecture 13
1.2. Meaning held in Materials 15
   1.2.1. Physical qualities of material 15
   1.2.2. The essence of Material 17
1.3. Expression of architecture 20
   1.3.1. Modes of expression 23
   1.3.2. Sings & symbols as means of expression 25
1.4. Expressive qualities in sacred architecture 27
1.5. Material as an expressive element in sacred architecture 33

Conclusion 37
Chapter 02
Material as an expressive element in Buddhist sacred architecture.

2.1 The Essence of Buddhist Philosophy. 38
2.2 The Reflection of Buddhist Philosophy in built environment. 41
2.3 Expressive qualities of Buddhist sacred architectures. 44
   2.3.1 Sacredness 44
   2.3.2 Tranquil 45
   2.3.3 Serene 46
   2.3.4 Relaxing 47
   2.3.5 Formality 48
   2.3.6 Dominants 50
2.4 Materials & techniques in expressing the meaning of the built form in Buddhist sacred buildings 52
2.5 Usage of materials as an expressive element in Buddhist architecture. 54

Conclusion 57

Chapter 03 - Case studies

Case study 01 Kelaniya Rajamaha Viharaya, Colombo 59

Case study 02 Dambulla Rajamaha Viharaya, Dambulla 67

Case study 03 Temple of the Tooth Relic, Kandy 72

Case study 04 Lankatilaka Rajamaha Viharaya, Kandy 77

Conclusion 82
