INTRODUCING SRI LANKAN BATIK BEFITTING CONTEMPORARY LIFESTYLE AND IDENTITIES

Andreea Muresan Lonhardt

(1683014F)

Thesis submitted in partial fulfillment of the requirements for the degree Master of Science in Textile and Clothing Management

Department of Textiles and Clothing Technology

University of Moratuwa

Sri Lanka

December 2019
DECLARATION

The Master Thesis entitled “Introducing Sri Lankan Batik, Befitting Contemporary Lifestyle and Identities” is my own original written paper. The content in the paper is the result of my research and study of traditional and modern batik printing and its application techniques.

I acknowledge and indicate that the bibliography of all the sources consulted are referenced in the paper. And, that it helped me in the process of writing the master thesis.

Also, I certify that all the assistance received in preparing the thesis, has been acknowledged as well and specified in the research. And, that it helped develop good academic practices, which brought awareness in avoiding plagiarism.

I further declare that I have not submitted my master thesis, “Introducing Sri Lankan Batik, Befitting Contemporary Lifestyle and Identities” to other universities for assessment.

Signature: Date:

I certify, that the candidate Miss. Andreea Muresan Lonhardt has carried out the research for the master thesis under my supervision and guidance.

Name of the supervisor:

Abstract

The research paper thesis explores the Sri Lankan textile heritage of traditional batik handicraft to pioneer new printing patterns techniques into clothing, so as to demonstrate the potential of reviving the textile industry that can be propelled to the international fashion scene.

The methodology of carrying out the research includes primary and secondary sources.

The first main part of the study covers the Sri Lankan traditional art of batik making. It looks into its history, origins, and methods of creating the patterns to decorate the cloths. Also, it looks into the ancient process of dying the fabric using natural ways, derived from plants, fruits and roots.

The research was carried out to investigate and analyze the traditional batik methods and printing patterns (samples, photographs, drawings) to enrich the study. And, it relies on methods such as books, batik showrooms and museum visits.

The second part focuses on working closely with a local batik craftworker to develop unique, intrinsic batik samples on cotton, that preserve the authenticity of Sri Lankan Heritage and reflect the contemporary fashion trends. The entire process was carries out in a local batik workshop to study, learn and observe closely the different process of making traditional batik printing and elaborate new samples.

In the third part of research a sample of the innovative batik designs is translated into clothing that follows a coordinated garment look such skirt and top. The look is designed in a fashionable modern way that includes contemporary cuts and production methods. All production methods were accomplished successfully demonstrated in a photoshoot.

After the successful completion of the three primary parts highlighted above, a survey was carried out, to assess the importance of Sri Lankan batik as a cultural identity in the local market and the need of finding new ways of application that reflect modern printing patterns and clothing designs.

The results show the potential to propel the Sri Lankan batik to the international fashion arena by preserving its traditional authenticity and adopting external contemporary fashion influences that follows current international trends.
ACKNOWLEDGMENT

I would like to thank everyone who has helped in carrying out the research and completing the “Master Thesis” paper.

I would like to express my appreciation to my supervisor Prof. Samudrika Wijayapala, Head of the Department, Department of Textiles and Clothing Technology, University of Moratuwa, who continually supported and guided me in my work and have ensured that I always receive constructive comments to help improve my paper. Also, gave me the wonderful opportunity to do my project on the topic “Introducing Sri Lankan Batik, Befitting Contemporary Lifestyle and Identities”.

I would like to thank Dr. Sanath Jayawardana, Research Coordinator, Department of Textiles and Clothing Technology, University of Moratuwa, for all the feedback received in class, which has helped me in finalizing the project within the limited time frame. I would also like to express my appreciation to the committee of lecturers for giving me valuable comments during the final presentation of project. Without the guidance received, it would not have been possible to complete the “Master Thesis” research.

In addition, I would like to thank as well Mr. Eranga Wickrama, Library Information Assistant, University of Moratuwa for his co-operation in providing reference material for my thesis. And, the National Museum of Colombo for granting me access to conduct the research within the Anthropology Division and Ethnology Division of Textile, Jewelry and Silverware.

Least but not last, I would like to thank the batik skilled craftworkers Mrs. Fernando and Mr. Kavindu, who have taught me the art of batik making using the traditional wax and dye method, incorporating several new techniques that helped in developing my design samples.

Finally, I would like to express my gratitude to my parents for their continuous support during my studies at University of Moratuwa, Sri Lanka.
