Abstract

Sri Lanka is one of the worst affected countries by 2004 Asian Tsunami which destroyed 2/3 of the Island's coastline. This necessitated massive reconstruction drive for recovery in all sectors including housing resettlements, health and educational infrastructure. Achieving stakeholder satisfaction is the key for the success of any project; and disaster reconstruction projects are of no exception in this regard.

The reconstruction of schools has been virtually completed but it is not yet known whether the stakeholders' interests have been properly addressed. The diverse nature of stakeholder interests in different stakeholder echelons means that the physical output alone does not represent the satisfaction levels or the success of those projects. This research is therefore aimed at evaluating the stakeholder satisfaction in disaster reconstruction process and studying the Tsunami damaged school projects in Sri Lanka.

A comprehensive literature survey on the Tsunami phenomenon, historical facts of disasters in Sri Lanka and 2004 Tsunami damages have been carried out together with a detailed study on disaster management cycle which interprets modern day disaster management as a cyclic process.

Data gathered from preliminary interviews and literature survey was used to establish factors of stakeholder satisfaction, which formed the body of survey instrument for structured interviews. Data collected using the structured interviews were analyzed by using Box Plot technique and Wilcoxon Signed Rank test.

The research reveals that the stakeholders of all categories are satisfied with the most of the factors of satisfaction especially with the physical reconstruction aspects such as standard of school buildings, adequacy of classroom facilities and infrastructure, adequacy of disaster preparedness measures and child-friendly zoning of buildings, But measures that are being taken by the decision making authorities on disaster

mitigation aspects such as early warning and practice of warning drills together with persistent attention on trauma counseling facilities for affected victims were found to be wanting.

Key Words : Disaster Reconstruction, Tsunami, Disaster Management Cycle, Stakeholder Satisfaction

Chapter One

Introduction

1.1	Introduction	1
1.2	Background.....	1
1.3	What are Disasters?	3
1.3.1	Disaster Management.....	3
1.4	Disaster Reconstruction.....	5
1.4.1	School Reconstruction.....	5
1.5	The Extent of Damage to Education Sector	5
1.6	Stakeholders of a Project	6
1.7	Stakeholder Satisfaction	7
1.8	Research Problem	7
1.9	Aim of the Study.....	8
1.10	Objectives	8
1.11	Summary of Research Methodology	8
1.11.1	Literature Survey	8
1.11.2	Preliminary Study.....	9
1.11.3	Data Collection.....	9
1.11.4	Data Analysis	9
1.12	Organisation of the Report	10
1.13	Summary.....	12

Chapter Two

Disaster Management Cycle

2.1	Introduction	13
2.2	Disaster Definition.....	13
2.2.1	Broader Definition for Disaster.....	14
2.3	Types of Disasters	14
2.4	Disaster Management Process.....	15
2.5	Disaster Management Cycle (DMC).....	16
2.5.1	Early Disaster Warning	19
2.5.2	Trauma Counselling	20
2.5.3	Regular Warning Drills	21
2.6	Disaster Mitigation	22
2.6.1	Structured Mitigation	23
2.6.2	Non Structured Mitigation.....	23
2.7	Summary.....	24

Chapter Three

2004 Tsunami Disasters in Sri Lanka

3.1	Introduction	26
3.2	What is Tsunami?.....	27
3.3	Causes of Tsunami.....	27
3.4	The Extent of Damage Caused to Schools by 2004 Tsunami	28
3.5	Reasons for the Extensive Damage in 2004 Tsunami	31
3.6	Early Disaster Warning Systems	33
3.7	Coastal Protection and Role of Government in Disaster Management	33
3.7.1.	Sri Lankan Governments' Provisions for Disaster Management.....	35
3.7.2.	Sri Lankan Government's Response to Tsunami Rehabilitation Programme	36
3.8	Stakeholders of School Reconstruction Projects and Reconstruction Guidelines	36
3.9	Summary.....	36

Chapter Four

Research Methodology

4.1	Introduction	38
4.2	Research Problem	38
4.3	Sampling for Questionnaire Survey	38
4.3.1	Proposed Scope of the Study and Concerned Geographical Area	39
4.4	Data collection.....	40
4.4.1	Preliminary Survey.....	40
4.4.2	Respondents' Views on Factors	41
4.4.3	Survey Instrument	42
4.4.4	Survey Sample.....	43
4.5	Summary.....	44

Chapter Five

Stakeholders of 2004 Tsunami School Reconstruction Projects

5.1	Introduction	45
5.2	Definition of Stakeholder	45
5.3	Types of Stakeholders	46
5.3.1	Primary Stakeholders	47
5.3.2	Secondary Stakeholders	47
5.4	Importance of Stakeholders.....	47
5.4.1	Importance of Stakeholder Analysis	47
5.4.2	Stakeholder Analysis.....	48
5.4.3	Understanding Stakeholder Perspectives	49
5.4.4	Costs of Stakeholder Analysis.....	50
5.4.5	Benefits of Stakeholder Analysis	50
5.5	The Stakeholders of the Tsunami School Reconstruction Project	51
5.5.1	School Children.....	51
5.5.2	Principals and Teachers of the Schools.....	52
5.5.3	Members of the School Development Society (SDS).....	52
5.5.4	Ministry of Education and TERM.....	52

5.5.5	Donor Organisations.....	53
5.6	Disaster Reconstruction Methods.....	55
5.7	General Guidelines for Disaster Reconstruction.....	56
5.7.1	Guidelines Set by the Government for Tsunami Damaged School Reconstruction Projects.....	57
5.7.2	Stumbling Blocks for Adhering to Buffer Zone.....	57
5.7.3	Preventive Measures in Reconstruction.....	59
5.7.4	Restoration of Coastal Eco-system.....	59
5.8	Government's Strategy for Tsunami Damaged School Reconstruction Programme.....	59
5.8.1	TERM and Its Role in Tsunami School Reconstruction Works.....	60
5.8.2	Project Implementation.....	60
5.8.3	Guidelines Stipulated for Donors in Education Sector.....	61
5.8.4	Design Concept for the Schools Buildings.....	61
5.8.5	Donor Organisations Who Funded the Reconstructed Schools Considered for this Research.....	63
5.8.6	Obstacles Faced by Reconstruction Programme.....	64
5.8.7	Summary of Assumed Stakeholder Expectations.....	65
5.8.8	Factors of Stakeholder Satisfaction.....	65
5.9	Summary.....	67

Chapter Six

Data Analysis

6.1	Introduction.....	68
6.2	Data Analysis.....	68
6.2.1	Percentiles, Quartiles and Inter-quartile Range.....	69
6.2.2	The Box Plot.....	70
6.2.3	The Statistics for Box Plots.....	71
6.3	Analysis Based on Box Plot Comparison.....	72
6.3.1	Common Question Category.....	73
6.3.2	Specific Questions for Students.....	78
6.3.3	Specific Questions for Teachers.....	80
6.3.4	Specific Questions for SDS.....	83

6.3.5	Specific Questions for Officials of Ministry of Education and TERM.....	85
6.3.6	Specific Questions for Donors	88
6.4	Wilcoxon Signed Rank Test	90
6.5	Summary.....	92

Chapter Seven

Conclusions and Recommendations

7.1	Summary of the Study	94
7.2	Findings	95
7.3	Significance of the Findings.....	98
7.4	Recommendations to Stakeholders.....	99
7.5	Contribution to Knowledge	102
7.6	Further Research.....	104

Acknowledgement

This research study is a result of able guidance and persistent assistance of many, who contributed immensely for its success. I was never without help and words of encouragement from them during many a hic up that came on my way during the research process. Therefore I wish to take this opportunity to express my sincere thanks and gratitude towards all of them.

It was my supervisor Dr.Yasangika Sandanayake, Senior Lecturer, Department of Building Economics who guided me through this research process with her able and excellent supervision. Her guidance, comments and constructive criticisms contributed significantly to the successful completion of this research.

I am grateful to Mr. Suranga Jayasena, Senior Lecturer, Department of Building Economics for his expert comments which helped a lot in fine tuning the research.

I owe a special thanks to Dr.Sepani Senaratne, the dissertation coordinator and Mr.Indunil Seneviratne, the Head of the Department of Building Economics for the encouragements extended to me.

Also I wish thank the students, teachers and SDS members of the schools subjected to the study together with officials of MOE/TERM, officials of EI and UNICEF, and school reconstruction professionals who actively participated in the study for without their corporation this study would not have been a success.

Last, but not least, I thank my staff and my family for their continuous help and encouragement throughout this study.
