ABSTRACT

This study performs an in-depth analysis of the impact of technology change and organizational culture change on Software Engineers. Software Industry is fast moving and rapidly changing. The knowledge workers interact with computers and attempt to model a real world scenario in intangible computer software. This process is not made easier by the evolution of software technology, new hardware and various process methodologies. Software Engineers today need to have the ability to grasp new technologies and make use of them.

Culture of an organization is the heart of what employees believe in. Organizational culture is defined as a way of life characterized by certain sets of behavior, assumptions, beliefs and attitudes. It is found that the organizational culture has a significant impact on the organizational effectiveness and the success.

University of Moratuwa, Sri Lanka.
Electronic Theses & Dissertations

The author presents an experiment and an analysis to find the impact of technological and cultural change on Software Engineers. This impact is studied in view of motivation and turnover intention of the Software Engineers. Hypothesis tests are performed in order to find the significance of this impact.

The results of the study show that there is a positive effect from technological change on Software Engineer's motivation and a negative effect from culture change on Software Engineer's motivation. Technology change does not seem to have a significant effect on Software Engineer's intentions to leave the organization but when it comes to the change of culture there is a significant effect. The Software Engineers wish to leave their organizations if a culture change is more frequent. The study concludes with recommendations of best practises to follow when technological and cultural change is needed.

ACKNOWLEDGEMENT

First of all, I would like to give my acknowledgement to Dr. Buddhinath Jayatilleke. In the initial proposal itself he saw my research problem as an interesting area, encouraged and guided me from the start till the end. He was both flexible and genuine in stating his opinion on the work and motivated me.

I would like to specially mention Mrs. Vishaka Nanayakkara and department of Computer Science for helping and guiding me along the path to completion of the research. If it's not for your patience and encouragement this would not be completed.

I would like to thank my family and my friends for bearing with me all this time when I was not able to spend time with them. They understood the situation and encouraged me to finish the work. I would like to acknowledge my parents, for encouraging me when I needed the most.

Thank you, Dantih Pathirage for the support you have given me to find resources in order to do a successful literature review. I would also like to show my gratitude to Mr. Gayath Rathnayaka and Mrs. Shiroshika de Silva for the feedback given on my work and specially for stating their honest opinion.

Last but not least to Deepthini Lanasakra for motivating me from the start till the very end.

TABLE OF CONTENTS

ABSTRACT.....	i
ACKNOWLEDGEMENT	ii
TABLE OF CONTENTS.....	iii
LIST OF FIGURES	vi
LIST OF TABLES	vii
CHAPTER 1: INTRODUCTION	1
1.1 Background.....	1
1.1.1 Introduction.....	1
1.1.2 Motivation.....	2
1.2 Research Topic.....	3
1.2.1 Problem Statement.....	3
1.2.2 Research Objectives.....	3
1.2.3 Significance of Study.....	3
1.3 Research Methodology	4
1.4 Nature and Form of Results	5
CHAPTER 2: LITREATURE SURVEY.....	6
2.1 Technology Change	6
2.1.1 Technology change in general.....	6
2.1.2 Relationship of technological change with personal attributes	8
2.1.3 Effects of technology change.....	8
2.2 Cultural Change	9
2.2.1 Cultural change in general	10
2.2.2 Obstacles to change culture	11
2.2.3 Cultural dimensions	13
2.2.4 Factors supporting change of culture in practice.....	15

2.3 Motivation.....	15
2.3.1 Motivation in Software Engineers context	16
2.3.2 Motivation in detail.....	17
2.3.3 Effects of demotivation	18
2.4 Turnover Intention	19
2.4.1 Effects of turnover intention.....	20
CHAPTER 3: RESEARCH METHODOLOGY	21
3.1 Theoretical background.....	21
3.1.1 Technology change dimension	21
3.1.2 Cultural change studies in general.....	21
3.1.3 Dimensions of motivation	22
3.1.4 Turnover intention dimensions.....	22
3.2 Relationship of Variables.....	22
3.3 Research Approach.....	23
3.3.1 Conceptual framework.....	23
3.3.2 Research Hypothesis.....	24
3.4 Research Design.....	26
3.4.1 Research Instruments.....	26
3.4.2 Operationalizing the variables	26
3.5 Sampling Design	28
3.5.1 Sample size	28
3.6 Data Collection	28
3.6.1 Interviews	28
3.6.2 Questionnaire.....	29

3.7 Data Analysis	29
3.7.1 Checking the reliability of the Questionnaire	29
3.7.2 Descriptive analysis	30
3.7.3 Statistical analysis.....	30
CHAPTER 4: DATA ANALYSIS	31
4.1 Reliability of the Research.....	31
4.2 Descriptive Analysis	32
4.2.1 Analysis of demographic variables.....	32
4.2.2 Descriptive statistics of the constructs.....	34
4.3 Statistical Analysis.....	42
4.3.1 Relationship of technology change and Software Engineer’s motivation...	42
4.4 Overall Results of the Study	49
CHAPTER 5: CONCLUSIONS & RECOMMENDATIONS	50
5.1 Recommendations.....	51
5.2 Limitations of this Study.....	53
5.3 Further Research	54
