

DECLARATION

“I certify that this thesis does not incorporate without acknowledgement any material previously submitted for a degree or diploma in any university to the best of my knowledge and believe it does not contain any material previously published, written or orally communicated by another person or myself except where due reference is made in the text. I also hereby give consent for my dissertation, if accepted to be made available for photocopying and for inter library loans and for the title and summary to be made available for out side organizations”

date

Candidate

To the best of my knowledge above particulars are correct

A handwritten signature in black ink, appearing to read 'Chandana Weerasinghe'.

Mr. Chandana Weerasinghe

Supervisor

Acknowledgement

I would like to take this opportunity to thank all the people who helped make this research a reality. First I would like to thank my supervisor Mr. Chandana Weerasinghe for all the support and advice given to me during the course of the thesis without which this thesis would not have been possible.

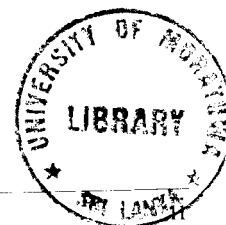

I would also like to thank all the lecturers at the department of computer science and engineering of the University of Moratuwa, for all of the feed back and advice provided. I would also like to take this opportunity to thank Isuru for all the assistance given through out the entire MBA program.

Also special mention is due to few of my colleagues at Roomsnet namely Narmadha, Shanika, Chamindee, Shawn, Anenthan and all the other many colleagues at Roomsnet who helped me out immensely by contributing their ideas and their time towards making this research a success.

Finally I would also like to thank all of the 357 Facebook participants who each gave up about 20 minutes of their time in order to fill out my questionnaire.

ABSTRACT	I
ACKNOWLEDGEMENT	II
1 INTRODUCTION	1
1.1 Background and Motivation	1
1.2 Project Title	1
1.3 The Problem Statement	2
1.4 The Objectives of the study	2
1.5 Importance and benefits of the study	2
2 LITERATURE REVIEW	3
3 THE RESEARCH DESIGN	8
3.1 Scope	8
3.2 Sample	8
3.3 Pilot Study 1	9
3.4 The Conceptual Model	10
3.5 Operationalizing Variables	13
3.5.1 Frequency of per person use of the web based social network (The dependant variable)	13
3.5.2 The time spent on Facebook	14
3.5.3 Trust in a person's network	14
3.5.4 Age	15
3.5.5 Completeness of the profile	15
3.5.6 Privacy	16
3.5.7 The level of ethics for the network as expected by the user	16
3.5.8 Prior offline contacts	17
3.5.9 New online contacts	17
3.5.10 Perceived Critical Mass	17
3.5.11 Number of friends	18
3.5.12 Emotional bond with Facebook	18
3.5.13 Usefulness of information tools	18
3.5.14 Satisfaction with life	19
3.5.15 Self-esteem	19
3.6 Pilot Study 2	19
3.6.1 Question 6	19
3.6.2 Question 7	20
3.6.3 Question 8	20
3.6.4 Question 9	20
3.6.5 Question 10	20
3.6.6 Question 11	20
3.6.7 Question 12	20
3.6.8 Question 16	20

3.7	Data collection and survey	21
4	OBSERVATIONS AND RESULTS	23
4.1	Time spent on Facebook	23
4.2	Average level of trust	24
4.3	Age	25
4.4	Completeness of the profile	26
4.5	The level of ethics	27
4.6	The level of lack of privacy	28
4.7	Number of friends	29
4.8	Emotional bond with Facebook	30
4.9	Prior offline contacts	31
4.10	New online contacts	32
4.11	Perceived critical mass of friends	33
4.12	Usefulness of information tools on Facebook	34
4.13	Self-esteem	35
4.14	Satisfaction with life	36
4.15	Sum of activity	37
5	DATA ANALYSIS AND DISCUSSION	40
5.1	Data Encoding	40
5.1.1	Gender	40
5.1.2	Completeness of profile	40
5.1.3	Self-esteem	40
5.2	Method of analysis	41
5.3	Testing of hypothesizes	41
5.3.1	The time spent on Facebook is related to that person's number of interactions	42
5.3.2	The average trust in a person's network is related to that person's number of interactions	43
5.3.3	The age of a person is not related to that person's number of interactions	43
5.3.4	The completeness of a person's profile is related to that person's number of interactions	43
5.3.5	The level of ethics expected by a user is related to that person's number of interactions	44
5.3.6	The average level of lack of privacy (openness) as expected by the person is related to that person's number of interactions	44
5.3.7	The number of friends on a person's network is related to that person's number of interactions	45
5.3.8	A person's emotional attachment to Facebook is related to that person's number of interactions	45
5.3.9	A person's prior offline contacts is related to that person's number of interactions	45
5.3.10	A person's new online contacts is related to that person's number of interactions	46

Table of Contents

5.3.11 A person's perceived critical mass of friends of a person is related to that person's number of interactions	46
5.3.12 The usefulness of information tools as seen by a person is related to that person's number of interactions	46
5.3.13 The self esteem of a person has no relationship to that person's number of interactions	47
5.3.14 A person's satisfaction with life has no relationship to that person's number of interactions	47
5.3.15 Model Building	47
6 CONCLUSIONS AND RECOMMENDATIONS	48
6.1 Recommendations for the major factors	49
6.1.1 Completeness of a person's profile	49
6.1.2 Perceived critical mass of friends and prior offline contacts	50
6.1.3 Number of friends on a person's network	50
6.1.4 Time spent on Facebook	50
6.2 Recommendations for the minor factors	50
6.2.1 Usefulness of information tools as seen by a person	50
6.2.2 Average trust in a person's network	50
6.2.3 Emotional attachment to Facebook	51
6.2.4 Level of ethics expected by a user	51
6.2.5 New online contacts	51
6.2.6 Average level of lack of privacy (openness) as expected by the person	51
