Introduction	
Topic explanation	01
need of the study	02
Intension of the study	03
Scope and limitations	03
Methodology	04
Chapter one - socio physical context of the street children	05
1.1 social context	06
1.1.1 formation of the street children	06
1.1.2 Reasons for children driving their lives on streets	07
1.1.3 Behaviour and habitats	08
1.1.4 Activities and involvements	10
1.2 physical context	11
1.2.1 Street children in Colombo city	11
1.2.2 Street children by zone	12
1.2.3 Usual place of stay	12
1.3 being a child in the society	14
1.3.1 Importance of community and space	16
1.3.2 Spatial needs of street children	18
Chapter two- built fabric of streets and its responsive places to street child	22
2.1 spatial levels of a city	23
2.2 urban streets as an element of the built environment	26
2.3 physical context	26
2.3.1 Spatial qualities relate with the form	26
2.3.2 Street space	27
2.4 social context - relates to the street child	33
2.4.1 Formal and informal spaces	33
2.4.2 Street edge	34
2.5 spatial function of a neighbourhood	35

Chapter three- case studies	40
3.1 street children in Colombo city	40
3.2 case study one -	42
3.2.1 Preamble	43
3.2.2 Basis of selection	43
3.2.3 Prevailing built fabric and its response to street child	44
3.3 case study two -	48
3.3.1 Preamble	48
3.3.2 Basis of selection	49
3.3.3 Prevailing built fabric and its response to street child	54
3.4 case study three -	59
3.4.1 Preamble	59
3.4.2 Basis of selection	
3.4.1 Preamble	59
3.4.2 Basis of selection	59
3.4.3 Prevailing built fabric and its response to street child	60
5.5 case study four -	64
3.5.1 Preamble	64
3.5.2 Basis of selection	64
3.5.3 Prevailing built fabric and its response to street child	65
Chapter four- identification of built fabric on street child	66
4.1 analytical method	66
4.2 Method in use	67
4.2.1 Architectural and visual inclusions	67
4.2.2 Landscape and infrastructure	79
4.2.3 Social factor	81
Conclusion	84
Bibliography	86

Declaration

I declare that this dissertation represents my own work, except where due acknowledgement is made, and that it has not been previously included in a thesis, dissertation or report submitted to this university or to another institution for a degree, diploma or other qualification.

ACKNOWLEDGEMENT

I am deeply indebted and profoundly grateful to all who guided me in the proper way and assisted me at my occasion sacrificing their valuable time exclusively for me during the course of preparing this dissertation. I offer my heartiest gratitude towards,

Dr M.S Manawadu, Head of the Dept for guiding me through out the course of preparing this dissertation.

A special note of thanks to Archt Sudarshana Wijegunawardana and Channa Daswatte for the inspiration, guidance and initial encouragement given to me to success this assignment.

I am ever so grateful to my lecturers, Archt R Alahakoon, Archt Gamini Weerasinghe, Archt D.P Chandrasekara, Archt Jayanath De Silva, Archt A Munasinghe, Dr Upendra Rajapakshe Archt Damith De Silva, for their valuable knowledge, time and advice given to me.

Lastly but not least I thank to my tutors eng, & landscape archt Susira Udalamtte and Dr Harsha Munasinghe for their words of encouragement, confidence and great support.

I offer my heartiest gratitude towards Prof Siddhisena and Dr Sasanka Perera of Colombo University, Ms Anuala Gamage and Mr Karunarathne of Sarvodaya Suwa Setha and Mrs Meral Perera of Marga Institute and Mr Padmasiri , for their dedication of time to support my dissertation.

I also extend my sincere thanks to my dear friends, spacially Wasana, Gemunu and Lakshika who stood by me right through.

Lastly, I look towards home to thank thaththa, amma, akka and malli who is forever by my side supporting me in every time.

Thilanka kumarasinghe,

April 2006
