# ACKNOWLEDGEMENT

First and foremost, I extend my sincere gratitude to my supervisors Mr. Raj Prasanna for his continuous guidance and tremendous encouragement throughout this research work. If it wasn't for his support this would have never been an achievable task.

I wish to thank Mrs Visakha Nanayakkara of University of Moratuwa for teaching us, the research methodologies and techniques in a very practical way. That knowledge was very useful in accomplishing this research work

My special thank goes to the management of Attune Lanka (Pvt) Ltd for the support extended towards me in many ways to conduct this research.

I wish to thank my sincere colleagues Mr. Ravindra Edirisinhe, Mr. Saliya Biyanwala and Mr Thumith Gamage for assisting me to carry out this research in terms of University of Moratuwa, Sri Lanka. knowledge sharing Tappreciated your valuable time spent on this regard Electronic Theses & Dissertations www.lib.mrt.ac.lk

Finally a bunch of thank is devoted to my dear parents, and to my dear wife Vijini for their patience, love and the immeasurable support extended towards me through out the MBA course.

#### ABSTRACT

Enterprise Resource Planning (ERP) systems have become a strategic business tool in modern dynamic environments. ERP systems play a vital role within the organizations by assisting in planning and managing the resources in the organization. Actually the success of any organization depends on how efficiently the resources are managed in the organization.

So far not many attempts have been taken to quantify the exact impact that an ERP causes on the performance of a company. In fact this is a very sensitive area to study since the value addition that an ERP causes differs from industry to industry.

This research attempts to quantify the benefits of ERP in an apparel manufacturing organization based on the literature which consists of information about previous attempts taken by many researchers in quantifying the benefit of LT investments in general and ERP systems in specific nic Theses & Dissertations www.lib.mrt.ac.lk

The research produces a detail framework to evaluate potential value addition to the company's operations due to both tangible and intangible benefits offered by the ERP for various aspects of the business. (e.g. Manufacturing, Procurement, HRM, Merchandising & Commercial operations etc). In order to quantify the value addition the researcher develops an ordinal scale. Using this scale the analysts can measure the improvements in each aspect of the business specifically.

The researcher suggests that these potential value additions (given by the scale) can improve the performance of the company in return. Hence he calls this potential value addition as the impact of ERP on the organizational performance. Finally in this research the proposed framework is applied on a Sri Lankan apparel manufacturing organization and the results given by the framework are analyzed against the actual performance of the company over the years in order to test the accuracy of the framework.
