DESIGNING AND IMPLIMENTATION OF AN IMPROVED  
REMOTE SUPERVISORY CONTROL AND VOLTAGE  
REGULATION SYSTEM AT WIMALASURENDRA POWER  
STATION

A dissertation submitted to the  
Department of Electrical Engineering, University of Moratuwa  
In partial fulfillment of the requirements for the  
Degree of Master of Science

By

S.W. KUMARAWADU

Supervised by Dr. Trishantha Nanayakkara

## DECLARATION

I certify that this dissertation does not incorporate without acknowledgement any material previously submitted for a degree or diploma in any University to the best of my knowledge and believe it does not contain any material previously published, written or orally communicated by another person or myself except where due reference is made in the text. I also hereby give consent for my dissertation if accepted, to be made available for photocopying and for interlibrary loans, and for the title and summary to be made available to outside organizations.

DECLARATION	ii
CONTENTS	iii
ABSTRACT	v
ACKNOWLEDGEMENT	vi
LIST OF FIGURES	vii
LIST OF TABLES	viii
CHAPTER - 1	
1 Introduction	01
1.1 Background and motivation	02
1.1.1. Wimalasurendra power station (WPS)	02
1.1.2. Present status of WPS	03
1.2 Excitation system of WPS	03
1.3 Governing system of WPS	04
1.4 Evolution of supervisory and control technologies	05
1.5 Scope of work	06
CHAPTER - 2	
2 Designing and implementation of Remote Supervisory & Control System	07
2.1 Remote Terminal Unit (RTU)	07
2.1.1 ADAM-4000 series	07
2.1.1.1 Remotely Programmable Input Ranges	07
2.1.1.2 Watchdog Timer	07
2.1.1.3 Ready for the Industrial Environment	08
2.1.1.4 Communication	08
2.1.1.5 RS-485 protocol	08
2.1.2 Analog Signal Inputs (4-20mA current loops)	08
2.1.3. Drawing Survey	09
2.1.3.1 Digital (Status) Inputs	09
2.1.3.2. Digital Relay Outputs ( Control Commands)	09
2.1.3.3 Drawings of the Modified Circuits	10
2.1.4 Relay Circuits for interfacing old system	10
2.1.5 Digital Input Module ( ADAM-4051)	15
2.2.6 Analog Input Module ( ADAM-4017)	16
2.1.7 Digital Output Module ( ADAM-4068)	16
2.2. Control Station	18
2.2.1. Converter module (ADAM-4520)	18
2.2.1.1 Built-in Intelligence	18

2.2.1.2	RS-485 network with Automatic Data Flow Control	18
2.2.1.3	Features of ADAM-4520	18
2.2.2	HMI (Human Machine Interface)	19
2.3.	Basic Configuration	21

## CHAPTER - 3

3	Improving the voltage regulation system of WPS using new supervisory & control system.	22
3.1	Back-ground	22
3.2.	Voltage Regulation	22
3.2.1	Duties of the automatic voltage regulator	22
3.2.2	Operational behaviour of synchronous machines	24
3.2.3	The principle of cross-current compensation	26
3.2.4	Special sequences in undisturbed operation	27
3.2.5	The transient behaviour generator – network	28
3.2.6	Excitation systems for synchronous machines	28
3.3.	Existing voltage regulating system in WPS	29
3.3.1	BJ-30 regulator	29
3.3.2	Operation principle of existing system	30
3.3.3	Present condition	32
3.4.	Testing of the existing system, for the new design	32
3.4.1	Voltage variation During a normal operation	32
3.4.2	Behaviour of the voltage variation during a system instability	33
3.4.3	Analysis for voltage feed back, generator current sensing and field current Sensing	34
3.4.3.1	Analysis of Gen. Voltage feedback	34
3.4.3.2	Generator current sensing	36
3.4.4.	Voltage variation for normal & quick response contacts QR and QL	38
3.5.	Modification of the excitation system for the design of new AVR	39
3.5.1	Description of the Circuit (AVR CCT 1)	39
3.6.	PLC based new voltage regulation system	41
3.6.1	Vision 230 PLC unit	41
3.6.2.	Description of the AVR CCT 2	42
3.6.3.	Ladder programming and limit calculations for voltage feed-back control	44
3.7	Performance analysis	45
3.7.1.	Voltage variation during a normal operation	45
3.7.2.	Voltage variation during a load rejection	45

## ACKNOWLEDGEMENT

First of all, I would like to thank Dr. D.P. Thrishantha Nanayakkara, who guided me through the entire project as the supervisor, with my appreciation and profound indebtedness for his help and advice.

Also I particularly want to thank Prof. Ranjith Perera and Dr. Sisil Kumarawadu for their guidance for the completion of the project.

I extend my sincere thank to Mr. C.P.W. Akarawita, DGM (L/C), CEB, for granting approval to purchase necessary equipment and implement the project at Wimalasurendra Power Station, Mr. S.S.B. Karuanaratne, CE(I & C) and Mr. W.M.T. Wijayananda, EE(I & C) of Laxapana complex for helping me during the project design and implementation and Mr. Vass Gunawardana, ES(m) and the maintenance staff of WPS, for helping me numerous ways.

Further, I would like to extend my sincere thank to My wife Dinusha, daughter Malmudu, loving mother and mother in-law for bearing my absence which they felt badly during the busy period I had while working on this project.
