ABSTRACT

In the global business arena, there is an intense competition, both in the world-wide and domestic marketplace. Due to this competition, business bodies of all sizes and varieties have more concern over market movements. It is important to foresee the market rather than arbitrarily competing. When we consider the benchmark of ceramic glazed tile business, it seems that China has managed to grow its market share rapidly in almost every region, and India also seems to be growing their business rapidly. Manufacturing of ceramic glazed tiles is one of the key businesses in Sri Lanka. The main intention of this analysis is to evaluate the ceramic glazed tiles market and develop a model to forecast its potential export opportunities in the coming years. This model of foreseeing the global export potential can help companies in making strategic decisions such as resource level decisions, setting objectives and evaluating performances, investing, exiting from current market, expanding, and venturing into new markets. Based on secondary data extracted from United Nations statistical division for international annual trading, we concluded that the Sri Lankan export market is highly reliant on Australian and North American markets. However, taking construction growth rates and worldwide trading figures into consideration, it is apparent that Sri Lanka has more opportunities in other regions. Based on the VAR model output, it could be concluded that the market will grow by CAGR 6 % (Benchmark 8.3%), 3% (Benchmark 17.1%) and 2% (Benchmark 15.8%) in the Africa, Asia and Middle East regions by 2024 where there are more opportunities. Other than these regions, Oceania, South America and North America are expected to grow by CAGR 10 % (Benchmark 2.8%), 8 % (Benchmark 4.8%) and 0.3 % (Benchmark 20.4%) respectively and there is more opportunity to expand current business in the Oceania region in the coming years.

Key words: ARIMA, Ceramics, Forecast, Multivariate, VAR

DEDICATION

To my wife, baby girl, parents, teachers and spiritual mentors

ACKNOWLEDGEMENT

It is with great appreciation that I would like to admire the support and knowledge given to me by Dr. P.M. Edirisinghe, Senior Lecturer, Department of Mathematics, during supervision of the thesis and I would like to pay my gratitude toward Professor T.S.G. Peiris, Professor in Applied Statistics and former Head of Department of Mathematics. Guidance given by them and suggestions helped me immensely in finishing this thesis in a way I can be pleased.

I would also like to express my gratitude to Mr. Mahendra Jayasekara, Managing Director at Lanka Tiles group for giving me the opportunity to join this industry. Mr. Nihal Kumarasinghe, Assistant General Manager Technical and Mr. Mahesh Mendis, Factory Manager at Lanka Walltiles PLC who always inspired and guided me throughout my career. Also, I would like to thank Mr. Anura Rathnayake, Group Business Development Manager at Lanka Tiles group who gave me vital information about international tile trading. Furthermore, I would like to acknowledge all the executives and staff for the support given during these few months at Lanka Walltiles PLC. Finally, I would like to thank all the lecturers and professors throughout my Master's and Bachelor's degrees who gave me knowledge and tools in order to handle the daunting tasks

LIST OF APPENDICES	xi
LIST OF ABBREVIATIONS	xii
CHAPTER 1	1
INTRODUCTION	1
1.1 Background	1
1.2 History of Ceramics	1
1.3 Process of Ceramic Tiles	2
1.4 Classification of Ceramics	2
1.5 Global Ceramic Glazed Tile Market.....	4
1.6 Sri Lankan Glazed Tile Industry.....	5
1.7 Sri Lankan Ceramic Glazed Tile Industry Challenges	6
1.8 Markets Needs to be Targeted	6
1.9 Research Objective	7
1.10 Significance of the Study	7
CHAPTER 2	8
LITERATURE REVIEW	8
2.1 Market Forecast Related to the Ceramic Tile Industry.....	8
2.2 Market Forecast Analysis Done in Similar Industries	10
2.3 Summary of Chapter 2.....	11
CHAPTER 3	12
MATERIALS AND METHODOLOGY	12
3.1 Data Sources	12

3.2 ARIMA Time Series Analysis	13
3.3 VAR/VEC Model	16
3.4 Granger Causality	17
CHAPTER 4	18
FORECASTING OF REGIONAL CERAMIC GLAZED TILES IMPORTS – UNIVARIATE APPROACH	18
4.1 Sri Lankan Export Market	18
4.2 Possible Markets to Target	19
4.3 Temporal Variability of Regional Imports	21
4.4. Forecasting Imports of Ceramic Glazed Tiles by ME Region.....	22
4.5 Forecasting Imports of Ceramic Glazed Tiles by African Region	27
4.7 Summary of Chapter 4.....	36
CHAPTER 5	37
FORECASTING OF REGIONAL CERAMIC GLAZED TILES IMPORTS – MULTIVARIATE APPROACH	37
5.1 Multivariate Forecasting for Regions Where Opportunity High	37
5.2 Multivariate Forecasting for Regions Where Opportunity is Moderate	50
5.3 Multivariate Forecasting for Regions Where Opportunity is Low	57
5.4 Forecast Evaluation and Comparison	63
5.5 Summary of Chapter 5	67
CHAPTER 6	68
CONCLUSIONS, RECOMMENDATIONS& FUTURE WORKS	68
6.1 Conclusions.....	68
6.2 Recommendations.....	68
6.3 Future Works	69
