## Acknowledgement

It is my great pleasure to extend my sincere gratitude to all those who helped, guided and advised in making this endeavor a success.

Fore and foremost I am really grateful to my supervisor Dr. Gamini Wijayarathna, Senior Lecturer, University of Kelaniya, for all the guidance, assistance and the encouragement extended to me, not only as a supervisor but also in a parental manner. If not for him I wouldn't have been successful in completing this project. Once again I should say "Thank you very much, Sir".

A special word of thanks to Dr. Ajith Madurapperuma, Senior Lecturer (Former Dean-IT Faculty) University of Moratuwa, for the frequent inquiries made by him indicating the importance of the making submission of the dissertation a success.

A very special thanks to my colleagues Nuwan and Inoka for their untiring effort in preparing this project in a presentable manner. I also wish to thank to my brother in law Gamini and sister Devika. If not for them I wouldn't have been encouraged to complete this MSc within the specified time limit.

I am grateful to my husband Ravi, daughters Pramodi and Dinithi for having patience in tolerating me, for my lapses at home as a wife and mother during the time devoted for this MSc. Their belief in me, and the persistent support, has given me a great self-confidence.
